

## Professor Phytoplankton

**Works at:** Professional Ocean Producer

**Lives in:** Pacific Ocean

- Without me, many small fish and whales would be miserable.
- I am one of two types of plankton. the other type is zooplankton.
- I need sunlight, water, and minerals to survive.

### Professor Phytoplankton

1 week ago

It's a beautiful day in the ocean today. I am hanging out as usual on the surface of the ocean to absorb the sunlight's energy. It's making me feel strong!

### Shrimp Bob

4 days ago

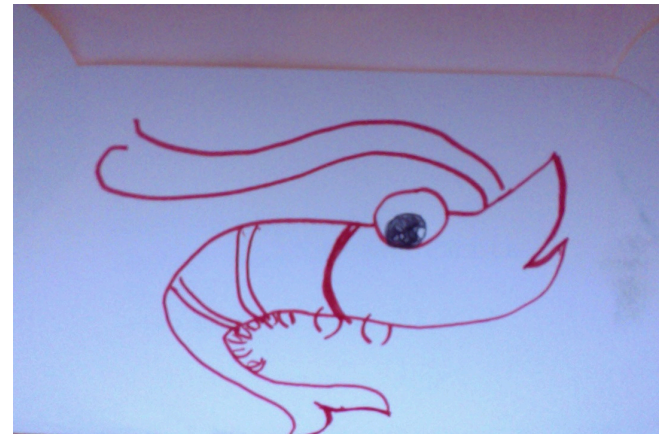

I ate @Professor Phytoplankton yesterday and was so proud of myself. Sadly I was eaten today by my predator, @TunaFish.

What a frightening day! I was eaten by a mean shrimp today. Have I ever mentioned how much I hate being at the bottom of the food web?
